About ConSet and ergonomics

Thank you for reading our catalogue.

Scandinavian ConSet is a manufacturer of electric height-adjustable desks. The justification for the products is that they contribute to efficiency, health and comfort in the workplace.

It is a fact, and the desks cannot be categorized as a gimmick or a toy.

It's a professional justification, that we take seriously, and it is the foundation of ConSet.

The first Conset table was delivered in the year 2000 and ConSet is among the pioneers of the product type. That's many years of product developments and production improvements! We meet some of the first tables if a spare part is needed. It is a pleasure that existing practice fit today's expectations.

The new catalog program has been changed by the fact that smaller tables are available in larger selections, and paradoxically, it also applies to larger ones that are suitable for many screens. Many tables are the same, but that does not mean that there is no development and improvement on these. Quality is in the details and not in the headlines. Continuity is a factor in reorders, and Conset recognizes that.

There is a lot of information and product models in the catalog and the products are similar, but the products all have their unique qualities to suit the needs of the offices and, most importantly, people. Especially the best sitting or standing height can be a challenge.

Find your desk height

Scan the QR-code and find the perfect desk to match your height and needs. The ConSet Height Calculator calculates the ideal sitting and standing height based on gender, how tall a person is and the height of their preferred footwear. The tool can also accommodate shared offices - it uses the height of the tallest and shortest colleague to give the best desk recommendation that can meet the needs of everyone in the office.

Check out the tool now!

Adapting to the future

ConSet was established in 1999 and would also like to be a participant in the future. The green transition is a reality, and manufacturers have a responsibility.

As an engineer-driven company, our choices are made rationally, and we needed quantitative information to actively drive the green transition in our operations. For too long we have been pushed by development - after all, everyone knows it is much more fun to pull yourself.

Therefore:

ConSet has performed a Life Cycle Assessment (LCA). The work has been carried out by external consultants and TÜV has conducted critical third party review.

The standard basis is: EN 14040, EN 14044 and EN 14071.

ConSet: design, develop, specify materials and choose processes for everything in our products, all we must do is get started and use the tools. We have it in our own hands, and it can be measured and weighed.

The analysis includes all the way the environment is affected by a product ranging from raw material to landfill/recycling. Nothing is unimportant, but greenhouse gases (CO₂) overshadows everything. We share information about emissions caused by our products on the website.

Perfection is an illusion. Quality, delivery and price still exist, but inside all priorities is now also how a product affects emissions and a concrete number is easier to understand than a lot of words.

Scan the QR code and read more about the results from LCA.

ConSet | Hands on desks 501-37

501-37

A Recognized Specialty

The 501-37 tables are special. The height travel is from 57 to 122cm. It suits users who are too short to fit in the standard for office furniture, and yes, of course, children too.

The tables fit people from 144 cm in height both seated and standing. The frame can be used with tabletops down to a depth of 60cm. The low height also means that the desk is great to be used with wheels, as it does not become too high for sitting with wheels fitted.

The table is available with 3 columns, either for L configurations or a multi-screen setup. Professional-use areas also show that the table is of well-tested quality.

ConSet | Hands on desks
501-37

ConSet | Hands on desks 501-43

501-43

More Furniture than Inventory

A table series that is available both as a regular desk and as a large corner table.

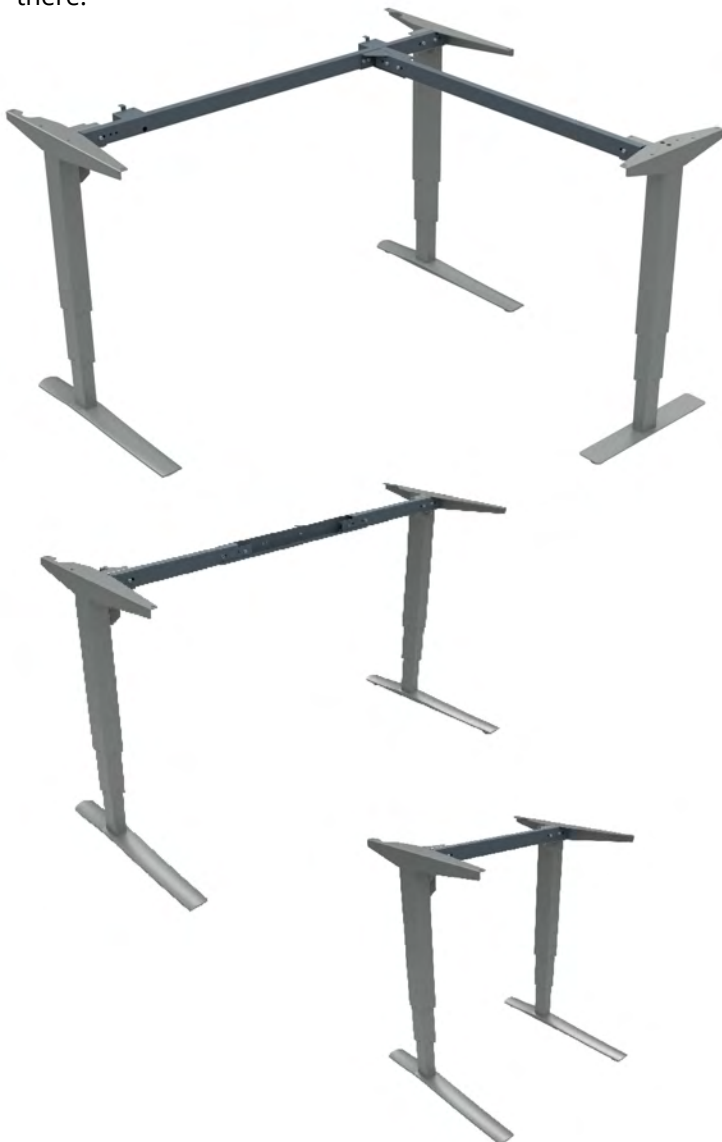

The height travel is 68 cm and it moves from 62 to 130cm.

The tables in the series can lift 100kg.

The desk delivers more than the standard requires on both travel and load capacity. There are 60 color/size combinations, and the desk is available in both 2 and 3 leg configurations.

The foot has a unique and thorough design that contributes to moving the visual expression from fixture to furniture. The design has been around for some years and it just gets better.

The series is the second most expensive in our program. Design and performance cost a little more, but the value is there.

ConSet | Hands on desks
501-43

ConSet | Hands on desks

501-20

ConSet | Hands on desks 501-20

501-20

Nothing Unnecessary

A desk that does what it should.
The first from ConSet with completely slim profiles, and yes, very stable.
The material consumption is minimized and only materials that are or can be recycled are selected.

It benefits on CO2 emissions and for the same reason, transport and packaging have been developed with CO2 in mind. There is nothing superfluous.

Ergonomics is important but must be incorporated into the greater environmental reality.
A new natural component in Nordic minimalism.

ConSet | Hands on desks 501-9

501-9

Small but Mighty

Sometimes the smallest product can prove to be the biggest challenge.

At ConSet we made our first small height adjustable pedestal table in 1999, and we quickly came to understand that there is a difficult compromise when making a slim 1-column desk that still feels robust.

With the 501-9 we have found the perfect balance between the two.

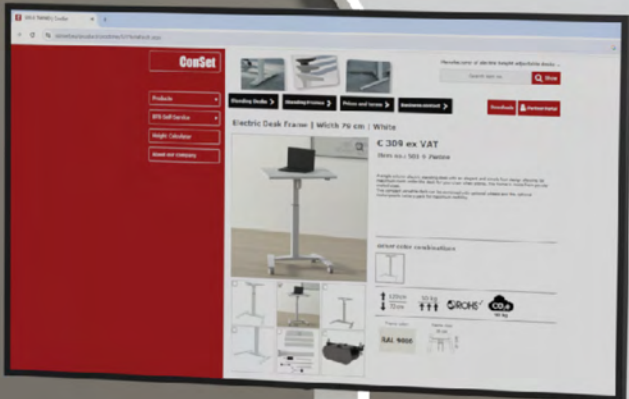

The desk can be wall-mounted or have a foot. Both variations use the same column.

The variant on a foot can advantageously be combined with wheels or a battery so your ergonomic working position can be moved not just up or down, but from room to room.

ConSet | Hands on desks

501-9

ConSet | Hands on desks

501-33

501-33

A Solid Compromise

The difference between the tallest and shortest person in the world is great.

Ideally the same desk could fit everyone both sitting and standing. Technically it can be solved, but the solution would require an overconsumption of both materials and funds, so practical thinking is required.

We are all familiar with the 80/20 rule, it is the one expressed in EN 527-1, TYPE D.

The standard defines the dimensions of a sit/stand desk suitable for 80% of the adult European population. The series 501-33 has these dimensions.

The 501-33 is a table for professionals who also have a 80/20 mindset. It is quickly assembled because it is produced in 3 large modules, is simple in function and operation.

The table will quickly become part of everyday life and will last for many years. As a total consideration, the 501-33 may be the cheapest of the series.

501-19

Stand-alone or grouping tables

501-19 Center (A)

- Sturdy and compact with a symmetrical design that allows access from all sides. Add the optional 75 mm heavy duty locking casters and rechargeable battery and you have complete mobility without any wires.

501-19 Basic (B)

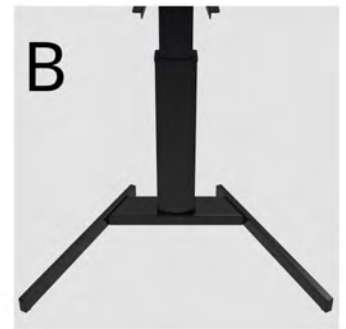

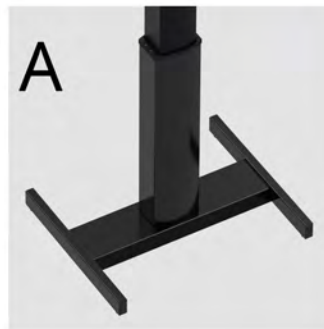

- The variation is excellent for grouping tables together. With 80 kg as the maximum load it can be used with a variety of tabletops. Add castors and a rechargeable battery for additional flexibility.

501-19 Design (C)

- A Unique style to this series with an attractive crescent shaped base, and well suited to be arranged in groups.

501-19 Corner (D)

- A triangle base, suited for corner placement. A wheel is fitted on the back corner, so the desk is mobile, all one needs to do is lift the front of the tabletop and pull.

ConSet | Hands on desks

501-23

501-23

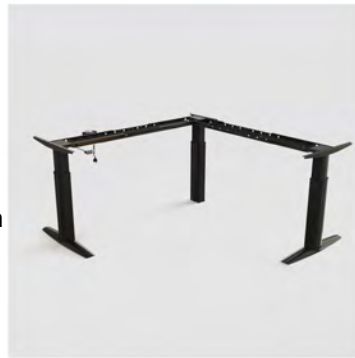

Distinctive and strong

More material, more strength. The 501-23 is a powerful, unyielding desk, that can lift 175 kg. The design is straight-forward and its center columns ensures maximum leg-room while keeping appearance of the desk as light as possible.

The options to configure the desk are endless:

- Wall hung, with the option to synchronize up to 3 columns at once
- 3 legs in an L-shape, it has a lot of tabletop space!
- 3-legs in a straight line, great for a meeting room desk
- Standard 2 leg frame solution, simple and popular.

A well-constructed desk that can do, almost, anything.

ConSet | Hands on desks

501-47

501-47

Standing meetings are an option!

501-47 is a base specially developed for meeting tables. Standing or partial standing meetings can provide a different dynamic and a more flexible relationship to the number of "seats".

The base can be supplied with 2 or 3 legs, and for both types there is a fixed lengthwise connection. Which provides stability independent of the tops. Lengths between 112 and 342cm.

A battery can be purchased to avoid interfering wires and cable routing can also be purchased. The lifting capacity is 150kg.

The model with 2 legs can also be used as a regular desk.

Worktops are not offered for all frame sizes.

ConSet | Hands on desks

501-88

ConSet | Hands on desks 501-88

501-88

Functionality and structure design

Bench or double tables are perfect for offices with focus on teamwork and close daily cooperation. Workers can still set their own desk height, but feel part of the team with a bench desk setup.

If needed a privacy screen can be put between the desks.

The concept has 3 advantages

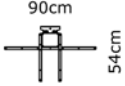

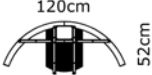

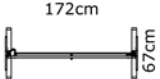

- With this desk set-up cleaning under desks is very easy. Less time spent cleaning an office is always a plus.
- Cable management is simple, and all cables can be distributed from the center cable tray to different workstations. And most importantly, kept off the floor.
- It is easier to maintain the aesthetic lines of a room. Many tables with many heights can make a room seem cluttered. This is minimized with double tables and the effect is enhanced with the use of separation screens.

STRENGTH AND STABILITY

Stability means everything when you're choosing a desk. Every height adjustable desk from ConSet is made with quality materials and meet both EU and Danish working-environment demands for a flexible and ergonomic workplace.

A height adjustable desk must work everyday and be easy to use for everyone. You can place your office equipment anywhere on a ConSet desk, and it will lift evenly and safely, even if the load is not loaded evenly. This unbeatable dependability is due to ConSet's one-motor-system. The operation is simple, no unnecessary complexity, just push the arrows for up or down on the user panel.

The total load on the desk frame must always be within the maximum working load that is specified for each ConSet product.

ONE MOTOR THAT DOES IT ALL

The one motor system and the simple mechanics that surround it, is the heart of a ConSet height adjustable desk. It ensures calm and gentle movements when you wish to move the table up or down and it ensures that the tabletop is always evenly adjusted.

- Real mechanics
- Real lifting capacity
- Less use of electronics
- Improved product lifetime

WORKING ENVIRONMENT

A ConSet desk will improve ergonomics for its users – and hopefully improve job satisfaction.

All ConSet tabletops are low emission E0(EN 717-1), so the formaldehyde emission is as small as possible, and poses no risk at all to users of the desk.

ConSet desks also have Clean Air GOLD certification.

CLIMATE CONCOIOUSNESS

At Conset we know it is important to minimize environmental impacts. We want to take responsibility for ensuring that our products are made respecting the environment. We do this in several ways:

- Life cycle assessment (LCA), in accordance with EN14040, EN14044 and EN14071 as a tool for targeted qualified improvements.
- CO2 emission calculations on all models.
- All electronic equipment meets RoHS framework for the reduction of hazardous substances in electronics.
- Through Elretur(Denmark) we ensure that electronic waste is managed environmentally through WEEE directive.
- The EUTR(EU timber regulation) is the law of the EU and will later be replaced by EUDR. ConSet wood products that are not imported, exported to the EU are not treated differently.

CE-MARKING AND PRODUCT APPROVALS

All ConSet height adjustable desk frames are CE marked in collaboration with the Technological institute in Denmark. CE-marking ensures that the producer has considered all security risks.

- EN 527-1/2: Dimensions / mechanical safety requirements methods of test for the determination of Stability and strength of the structure.
- DS/EN 12720-21-22: Furniture assessment of surface resistance to cold liquids wet and dry heats.

ConSet - A BRAND FROM SCANDINAVIA

ConSet was founded in 2000 in Denmark (Scandinavia) with the basic philosophy that ergonomics should not be expensive. We began to develop and manufacture high quality, electric height adjustable desk and made them affordable so more people could experience the benefits of sit-stand desks. The company has succeeded well and now has distribution and subsidiaries throughout the world.
